

INDIAN CREEK VILLAGE, FLORIDA

July 01, 2020

Dear Resident:

BERNARD KLEPACH
MAYOR

JAVIER HOLTZ
VICE MAYOR

ROBERT DIENER
COUNCIL MEMBER

IRMA BRAMAN
COUNCIL MEMBER

IRWIN E. TAUBER
COUNCIL MEMBER

JENNIFER MEDINA
VILLAGE MANAGER

STEPHEN J. HELFMAN
VILLAGE ATTORNEY

MARILANE LIMA
VILLAGE CLERK

Subject: 2019 Consumer Confidence Report

The United States Environmental Protection Agency requires the Village to report specific information about our water system. Enclosed is the 2019 Consumer Confidence Report (CCR) for the Indian Creek Village water system prepared by Miami-Dade County (County). The drinking water in the Village is purchased directly from the Miami-Dade Water and Sewer Department (WASD).

The data presented in the enclosed report shows the results for parameters detected in the County water supply during the reporting period. We are pleased to report that our drinking water, supplied by WASD, has met the federal, state and local standards for all applicable parameters detected during the monitoring period year 2019.

The Village is also required to perform additional testing to monitor for lead, copper, total trihalomethanes and total haloacetic acids in the drinking water, in accordance with Federal regulations. The data presented in the table attached shows the results of the additional tests performed by the Village during the 2018 and 2019 monitoring periods. The 90th percentile results for lead and copper for the Village water system were 1.5 parts per billion (ppb) and 150 ppb, respectively. The lead and copper results for the homes tested were all below the Federal Action Levels of 15 ppb for lead and 1300 ppb for copper.

Lead and copper levels at your home may be higher than at other homes in the community as a result of materials used in your home's plumbing. If you are concerned about elevated lead and copper levels in your home's water, you may wish to have your water tested and/or flush each tap for 30 seconds to 2 minutes before using the tap water to minimize the potential for lead exposure.

The presence of contaminants does not necessarily indicate that water consumption will pose a health risk. Some contaminants are naturally present in the environment. Additional information on contaminants and potential health risks is also available from the Safe Drinking Water Hotline (1-800-426-4791) or online at www.epa.gov/safewater. Copies of the enclosed 2019 CCR, are available at the Village Hall. Thank you.

Sincerely,

Marilane Lima
Village Clerk

**2019 CONSUMER CONFIDENCE REPORT
INDIAN CREEK VILLAGE WATER QUALITY DATA**

PARAMETER		MAJOR SOURCES					
Contaminant and Unit of Measurement	Dates of Sampling (Mo/Year)	AL Exceeded Yes/No	90th Percentile Result	Number of Sampling Exceeding AL	MCLG	AL (Action Level)	Likely Source of Contamination
Copper (Tap Water) (ppb)	August 2018	NO	0.15	NO	1300	1300	Corrosion of household plumbing
		(0 OF 8)					Erosion of Natural Deposits
Lead (Tap Water) (ppb)	August 2018	NO	0.0015	NO	0	15	Corrosion of household plumbing
		(0 OF 8)					Erosion of Natural Deposits
Contaminant and Unit of Measurement	Date of sampling	MCL violation Yes/No	Total Positive Samples for the year	MCLG	TT	Likely source of Contamination	
<i>1a- Total Coliform Bacteria</i>	January-December 2019	NO	0	0	NO	Naturally present in the environment	
Contaminant and Unit of Measurement	Dates of Sampling	MCL violation Yes/No	Level Detected	Range of Results	MCLG	MCL	Likely Source of Contamination
Stage 2 Disinfectants and DBP							
<i>Haloacetic Acid (ppb)</i>	August 2019	NO	23.52		N/A	60	By-Product of Drinking Water disinfection
<i>Total Trihalomethanes (ppb)</i>	August 2019	NO	18.21		N/A	80	By-Product of Drinking Water disinfection

AL= Action Level
MCL=Maximum contaminant level
MCLG=Maximum contaminant level goal
ppb= Parts per billion or micrograms per liter (µg/L)
